EXPERIENCED. BEI was a dream that started back in 1966 by Marvin Bamsch. Marvin was an innovative machinist who knew how to make quality parts. Word got around, and people asked him if he would go into business and make quality parts for them. Marvin accepted the challenge, and thus, the beginnings of Bamsch Enterprises was born. Over time the company grew, and while keeping the best machinist skills and hard working business values as the core, I added the latest technologies available to produce parts more efficiently. Family owned and operated for more than 45 years with a combined century of experience, BEI prides itself in being a quality manufacturing facility who keeps its promises with delivering quality parts, on time.

MANUFACTURER. BEI takes the best available raw materials out there and makes quality parts from it. We cut it, machine it, chrome it, grind it, coat it and package it in ways to fit your needs. Our inventory includes Crosshead Extension Rods, Piston Rods, Sub Rods, Pony Rods, Rod Clamps and even Wear Plates for your Triplex, Quadruplex, Quintuplex and Hex Mud Pump needs. And if you don't see it in our product line, custom parts are available - just send us a print and we'll make it for you. Our shop floor has the latest CNC technologies including Lathes, Mills and Cylindrical Grinders to make what you need, when you need it. Run by experienced machinists who take pride and care about every piece that they make, backed by a company who stands by how it is made.

of QUALITY. BEI parts are built to last. Whether your pump is out on a rig in the middle of the ocean, or drilling miles and miles from an airport onshore, you want parts that you can depend on. BEI parts are built that way, backed by ISO Principles including complete traceability. We think they're the best parts in the industry, built in the USA by hard working Americans. Excellent, quality parts that will last.

So give us a call or send us an email and set up an appointment to meet us. Our success is founded on years of helping companies like yours, providing great parts to keep those pumps running. **BEI Manufactures Quality!**

Neil Bamsch Owner, Bamsch Enterprises International, Ltd.

BAMSCH ENTERPRISES INTERNATIONAL PO Box 41348 Houston, TX 77241-1348 7113 Chippewa Blvd Houston, TX 77086-3226 sales@beioil.com www.beioil.com

WE MANUFACTURE QUALITY.

That's what we do. As an outstanding manufacturer of Fluid End Replacement parts for drilling fluid mud pumps, Bamsch Enterprises International (BEI) ranks second to none in providing quality parts for the Oil and Gas industry.

Our customers count on it.
